

Asbestos Notification

Under AHERA (Asbestos Hazard Emergency Response Act), all primary and secondary schools are required to develop and implement a plan for managing all building materials which contain asbestos. Included in the AHERA Act is the requirement to annually notify all workers and building occupants (or their guardians) of asbestos-related activities.

Beginning in 1988, all buildings owned, leased, or "under the control of" the School District were inspected by EPA accredited inspectors, with building material samples analyzed by an independent laboratory. Based on the inspection, the School District prepared and the state approved a comprehensive management plan for managing the asbestos.

Where the asbestos-containing materials are found, the District has in place an Operations and Maintenance program.

The District has accomplished the following compliance mandates regarding the administration of asbestos in school buildings: Environmental Management Consulting, Inc. (EMC) was contracted to be the school's consultant for asbestos.

The District is continuing with the Operations and Maintenance Program as designed for the School District. This ensures that all asbestos materials are kept in good condition.

The buildings are inspected by an accredited inspector every three years.

All outside contractors shall contact the Lead Maintenance person before commencing work.

A copy of the Asbestos Management Plan is available for review by contacting the school office. Questions related to this plan should be directed to the designated Asbestos Program Manager, Don Keck (Building and Grounds Manager) who can be reached at 715-345-5518.

Our goal at the District is to be in full compliance with asbestos regulations.

It is our policy to maintain a safe and healthful environment for our students and our staff members.
